Press release

Bouygues Telecom launches a mobile broadband internet offer for consumers

On 20 November 2006, Bouygues Telecom will launch a mobile broadband internet offer targeting consumers. This offer will enable all its customers to access the internet from a laptop and stay in touch whilst on the move.

A mobile broadband internet card

Bouygues Telecom's new offer can be accessed from a laptop equipped with a mobile broadband internet card. Available from selected Bouygues Telecom sales outlets, the card works on the GPRS and EDGE networks.

- *Quadri-band*
- *Installation kit and connection software*
- *Windows 2000 and XP compatible from a laptop equipped with a PCMCIA Type II port*
- *Retractable antenna*

A data plan with no time limit

A simple, affordable 100MB data plan at a rate of €29.90/month (with a 24-month contract) is available to all consumers, with no obligation to subscribe to a voice plan. The data plan lets customers send and receive emails, surf on the internet and use instant messaging services – with no time limit.

Bouygues Telecom offers an additional 100MB/month for six months for every new subscription to a 100MB data plan.

An unlimited plan for business customers

Bouygues Telecom also offers an **unlimited data plan** for business customers at a rate of €69/month (with a 24-month contract).

This unlimited plan lets professionals access all their regular applications from a laptop equipped with a broadband digital card: email/calendar, internet, and business applications and data.

Thanks to Bouygues Telecom's efficient nationwide broadband network EDGE, which covers more than 91% of the French population, customers benefit from:

- higher speeds for enhanced user comfort,
- a service available throughout France,
- a service that is easy to install and use.
